

# US Antarctic Program & WIGOS

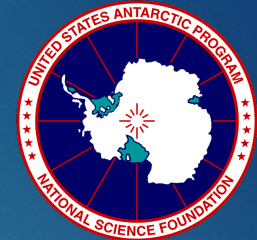

DR. MATTHEW A. LAZZARA

AMRC/SSEC, UNIVERSITY OF WISCONSIN-MADISON

CHAIR, DEPARTMENT OF PHYSICAL SCIENCES,  
SCHOOL OF ARTS AND SCIENCES, MADISON AREA  
TECHNICAL COLLEGE

&

WORKING GROUP FOR OBSERVATIONAL DATA  
(WG/OD)/COMMITTEE FOR OPERATIONAL  
PROCESSING CENTERS (COPC)/OFFICE OF  
FEDERAL COORDINATOR FOR METEOROLOGICAL  
SERVICES AND SUPPORTING RESEARCH (OFCM)

# Outline

- ▶ What is WIGOS?
- ▶ Why are we doing this effort?
- ▶ How will the USAP deal with this?
- ▶ When is this happening?
- ▶ Who is involved?
- ▶ Where can I learn more?
- ▶ Feedback & Comments & Questions

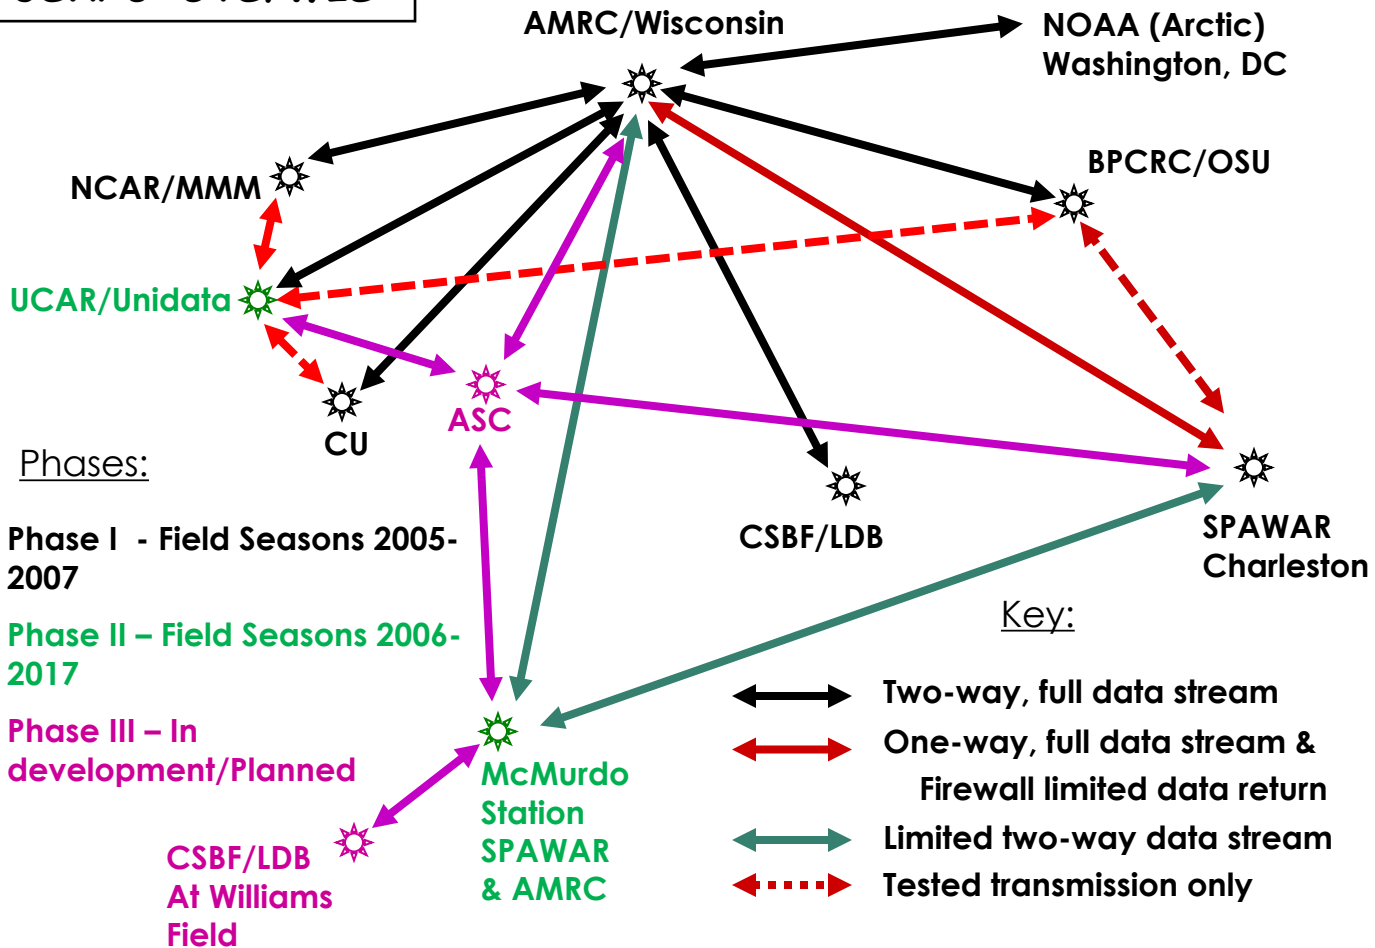

# What is WIGOS?

- ▶ World Meteorological Organization (WMO)
- ▶ World Weather Watch (WWW) program
- ▶ Global Telecommunications System (GTS)
- ▶ WMO Information System (WIS)
- ▶ WMO Integrated Global Observing System (WIGOS)
  - ▶ “...The “framework” for collecting and disseminating data and products (which include weather observations from around the Antarctic)...”
  - ▶ Linking Metadata to Observations!!!

# Antarctic-IDD USAP's "GTS/WIS"

Status as of 2018

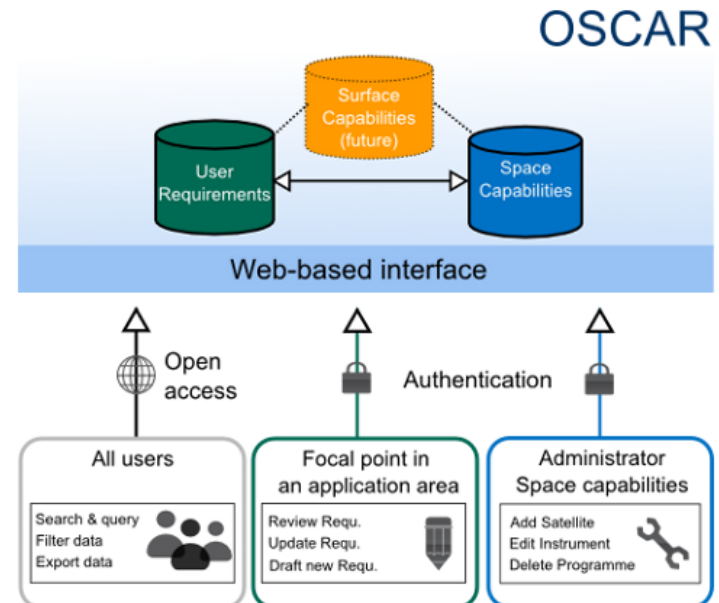

**Others welcome to join!**

# Why are we doing this effort?

- ▶ To link observations and their metadata
  - ▶ Prevent systematic errors
  - ▶ Avoid transmission of unchanging information
- ▶ World Weather Watch (WWW)
  - ▶ WMO ID numbers have run out
- ▶ Non-WWW networks
  - ▶ How refer to and handle “partner” systems?

## OSCAR:

- ▶ Observing Systems Capability Analysis and Review Tool
- ▶ Metadata management system for the WMO.
- ▶ Wisconsin AWS network is filed there
  - ▶ Work to be done on its management
  - ▶ Proposal pending to work on this.

# Principles in play...

- ▶ No implicit meaning in station identifiers
- ▶ All contributing observations must have station identifier
- ▶ Unique – no station identifier refers to more than one station/platform
  - ▶ (Separate ID for radiosonde vs synoptic obs)
- ▶ Applicable to all observing systems operated by anyone
- ▶ Extensible – do not need to issue new identifiers if system needs to be expanded
- ▶ *Absorb existing systems for identifiers*

# How will the USAP deal with this?

- ▶ Attempts being made to comply with WIGOS via US AWS Program test cases
  - ▶ Direction from Dr. Kelly Faulker/Dr. Alex Isern
- ▶ The AWS Program is the test network in the USAP
  - ▶ Supplemental funding required to “seed” this effort
  - ▶ Moving AWS data into BUFR format in particular
  - ▶ Issues and questions:
    - ▶ For example, is NCAR able to take in non-WMO ID data (most NWP Centers are not ready for this, and request “legacy” ID formatting)

# When is this happening?

- ▶ If funded: Fall 2018 we start...
- ▶ Later on – issues to deal with include:
  - ▶ USAP staffed stations (synoptic/radiosonde),
  - ▶ Aircraft,
  - ▶ Ship/buoy,
  - ▶ non-Wisconsin AWS or other observing networks.

# Who is involved?

- ▶ NSF/USAP
- ▶ NOAA
- ▶ USAF
- ▶ US Navy
- ▶ NWP centers

## NOAA

- National Environmental Satellite, Data, and Information Service/Office of Satellite and Product Operations (NESDIS/OSPO), Suitland, MD
  - National Centers for Environmental Information (NCEI)
    - Center for Weather and Climate (CWC) (formerly NCDC)
- National Weather Service (NWS), Silver Spring, MD
  - National Centers for Environmental Prediction (NCEP), College Park, MD
    - Environmental Modeling Center (EMC)
    - NCEP Central Operations (NCO)
      - NCO-DM (NCO Data Management)
    - Space Weather Prediction Center (SWPC)
  - Office of International Affairs
  - Office of Observations
    - National Data Buoy Center (NDBC)
  - Office of Dissemination
- Office of Oceanic and Atmospheric Research (OAR)

## DoD and other Agencies:

- Air Force
  - 557<sup>th</sup> Weather Wing, (Air Combat Command) Offutt AFB, NE
  - 14<sup>th</sup> Weather Squadron, Asheville, NC
- Navy
  - Fleet Numerical Meteorology and Oceanography Center (FNMOC), Monterey, CA
  - Naval Oceanographic Office (NAVOCEANO), Stennis Space Center, MS
  - Naval Research Laboratory-Marine Meteorology Division, Monterey, CA
- Joint Center for Satellite Data Assimilation (JCSDA) (Headquarters), College Park, MD
- The U.S. Integrated Ocean Observing System (IOOS)

# Where can I learn more?

- ▶ Web sites:
- ▶ <https://www.wmo-sat.info/oscar/>
- ▶ [https://www.wmo.int/pages/prog/www/wigos/index\\_en.html](https://www.wmo.int/pages/prog/www/wigos/index_en.html)
- ▶ ***See Matthew for US draft documentation***

# What is a WIGOS identifier?

- Consist of 4 separate segments/components
  1. “WIGOS Identifier Series” – a numeric value from 0-14, currently only 0 is defined
  2. “Issuer of identifier” – a numeric value from 0-65535
  3. “Issue number” – a numeric value from 0-65535
  4. “Local identifier” – an alphanumeric value of up to 16 characters
- The first 2 components are defined by WMO, while the last 2 components are largely left up to individual countries to define, except for sites which already had a WMO-sanctioned identifier prior to 1 July 2016
  - The last 2 components are where WG/OD focused its aforementioned guidance, including allocating ranges of numbers to be used by various U.S. agencies when defining WIGOS identifiers for their own sites
- WIGOS identifiers are much longer than traditional WMO identifiers, so one of the major challenges will be for the community to account for this within their internal processing

# What is a WIGOS ID? (cont.)

A complete WIGOS ID consists of four segments (or components):

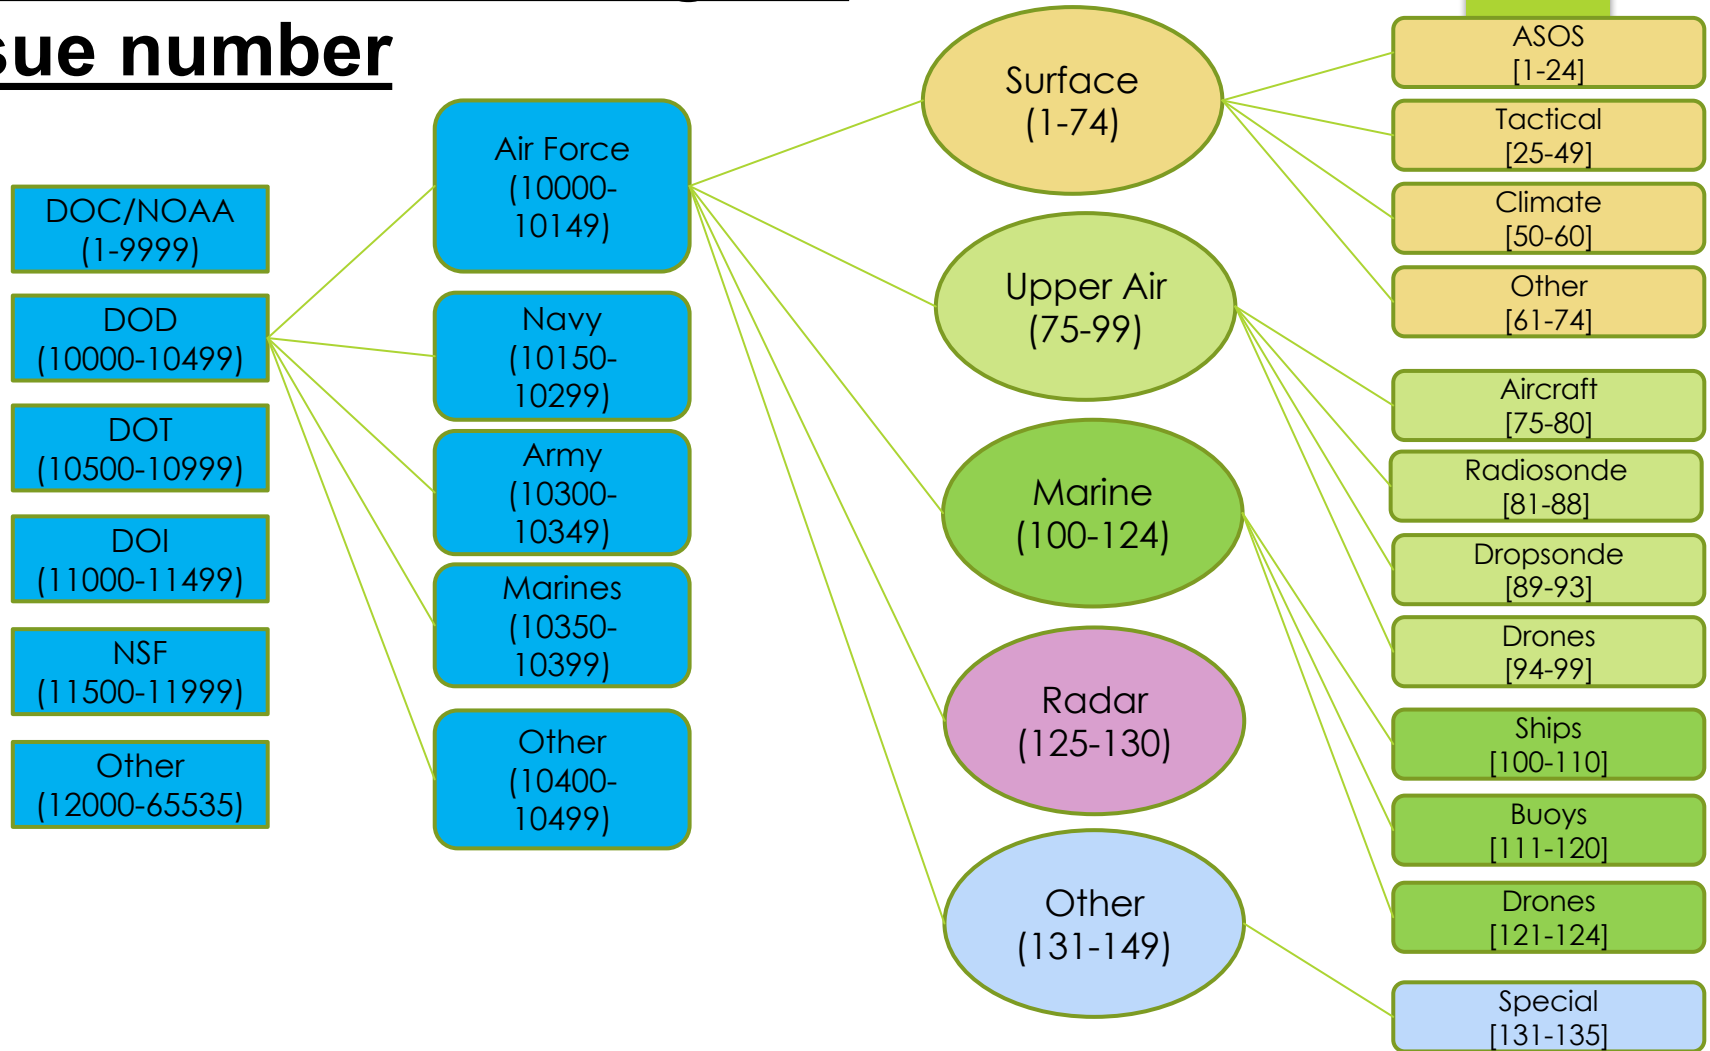

WIGOS Identifier Series (numeric)		Issuer of Identifier (numeric)		Issue Number (numeric)		Local Identifier (alphanumeric, specified characters)	
0	-	200000	-	0	-	72363	
0	-	840	-	301	-	RVA	
0	-	840	-	11500	-	AWS.89-09	
							
WMO Controlled				Country Controlled			

# Examples – New Identifiers

Example	WIGOS Id Series	Issuer of Identifier	Issue Number	Local Identifier
UK station 0-619-3-1234546	0	619	3	123456
Canada 0-530-1-02536	0	530	1	03536
CTBTO 0-891-0-WIEN	0	801	0	WIEN

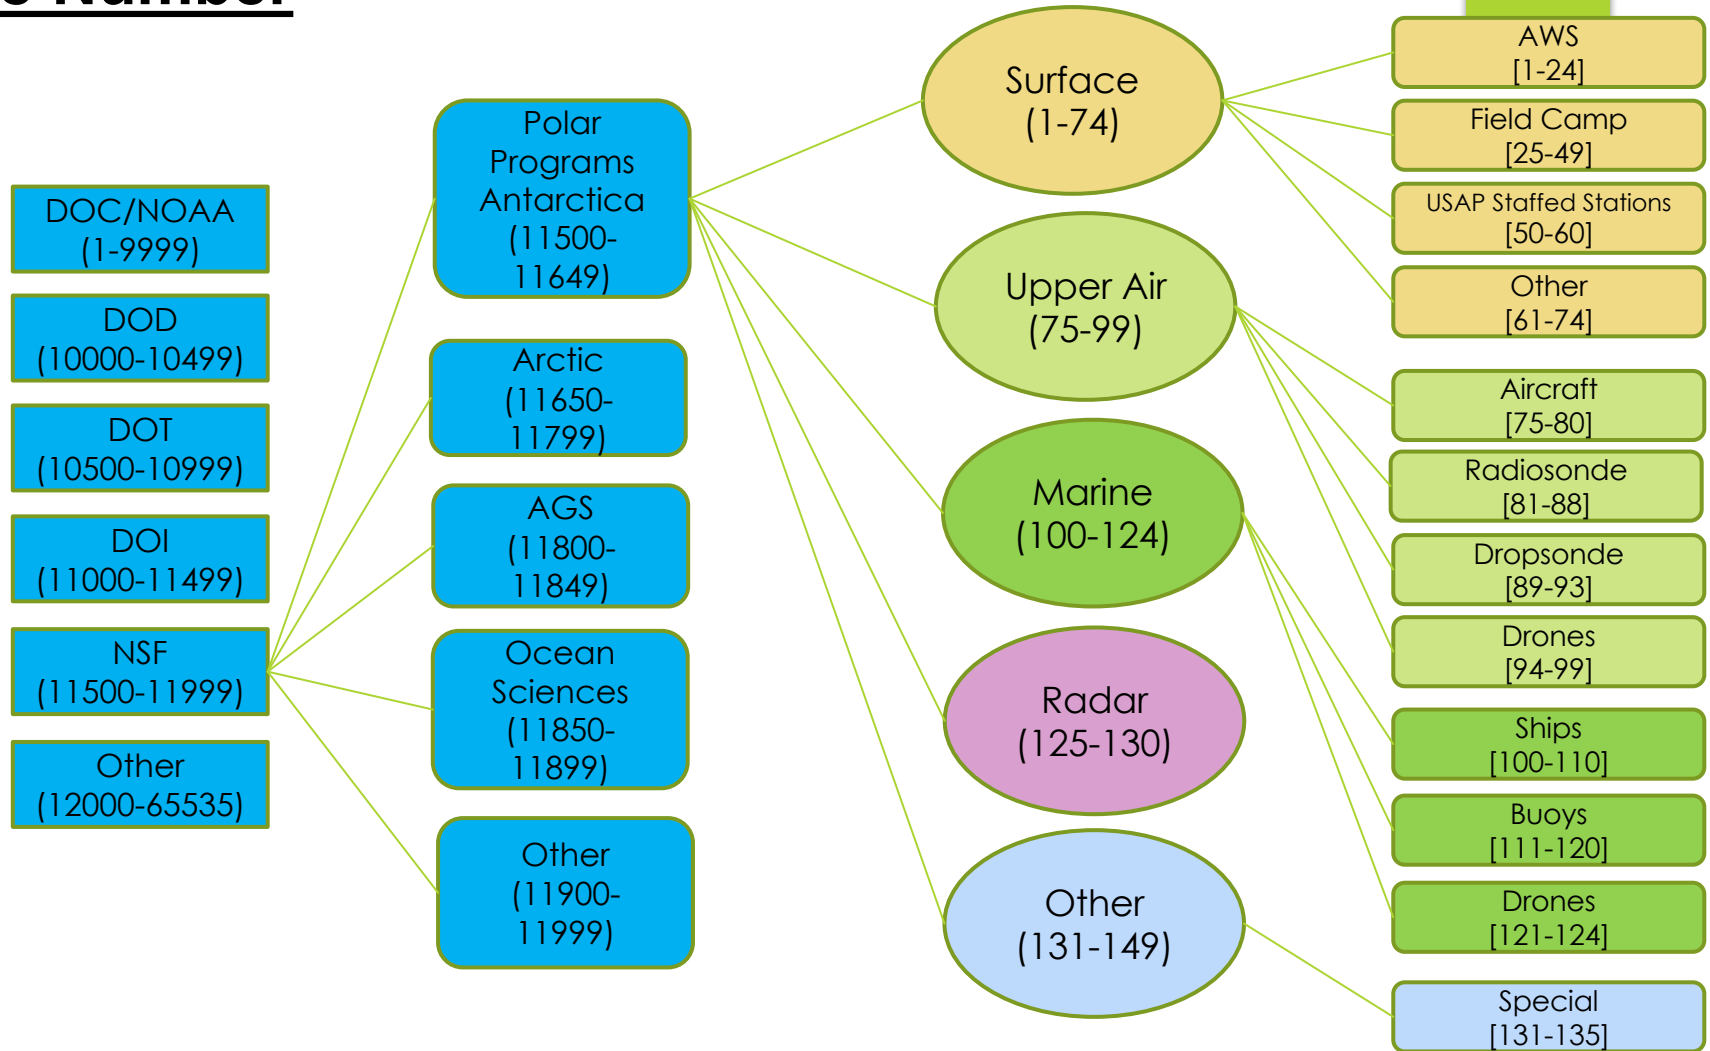

# Branski “Bubble” Diagram

## Issue number

# Lazzara's "Branski 'Bubble' Diagram for NSF/USAP

## Issue Number

# Example USAP WIGOS ID....

- ▶ Following the rules:
  - ▶ Byrd AWS (Wisconsin Network):
    - ▶ **0-20000-0-89324**
- ▶ What we could be doing:
  - ▶ Byrd AWS (Future Madison Area Technical College Network):
    - ▶ **0-840-11500-MATC.Byrd.2020**
- ▶ Again, Concerns with NWP Centers are at issue.
  - ▶ NCAR?
    - ▶ No included in this discussion at any level?
    - ▶ Same concerns?

# Feedback & Comments & Questions?

THIS MATERIAL IS BASED UPON WORK PARTIALLY SUPPORTED BY THE NATIONAL SCIENCE FOUNDATION, DIRECTORATE FOR GEOSCIENCES, OFFICE OF POLAR PROGRAMS, UNDER GRANT PLR-1543305.

ADDITIONAL THANKS TO SUPPORT FROM NOAA, OFCM, COPC. AND ESPECIALLY TONY RAMIREZ
